

COR-1316
COPY 1 OF 1

In reply refer to:
SP-960
August 25, 1961

Dear Wendell,

Thanks for your prompt reply to my letter SP-945 inquiring about DD Form 250's. As discussed with Jim this morning it is possible that the DD Form 250's under RT-100 which appear to be missing may be attached to the invoices issued to cover those particular deliveries. If this is not so, during your visit next week we can discuss methods of replacing those missing copies. Evidently some such action will be necessary with regard to No. 23.

Enclosed are the original and one copy of DD Form 250 numbers 26 and 27 covering the first two shipments under the C' program and number 28 covering the eighth system under the C' program. Although DD Form 250 No. 28 references a usage as backup for units 1112 and 1113, this unit is the final system deliverable under its contract; all subsequent deliveries will be partial systems only even though temporarily mated with GFE nose cones and checked out to be compatible therewith.

With regard to DD Form 250 number 17, a further search of our files has disclosed that two copies of that document are on hand. Would you kindly advise if your usual three copies are in your possession or whether these copies are necessary to complete your documentation. We are returning the number 17 which you forwarded to us with many thanks for your giving us the opportunity to reproduce a copy thereof.

Very truly yours,

Waver
